

**IN THE CLAIMS:**

Cancel claims 1, 2, 5, 8, and 9.

None of the claims have been amended herein. All of the pending claims are presented below. This listing of claims will replace all prior versions and listings of claims in the application. Please enter these claims as previously amended.

**Listing of Claims:**

1. through 18. (Canceled)

19. (Previously Presented) A remote computer keyboard comprising:  
an enclosure member;  
a chemical source of electrical power;  
a transmitter mounted on said enclosure member, said transmitter powered by said chemical source of electrical power;  
an insulative material layer covered with circuit traces, said insulative material layer being positioned in said enclosure member, said circuit traces being coupled to said transmitter;  
a plurality of depressible key switch devices arrayed above said insulative material layer;  
a key cap mounted atop each switch device of said plurality of switch devices, each key cap having at least one identifying graphic symbol formed on a surface thereof of a first material having no electrical connection thereto including one of a black material and a dark-colored non-luminescent material; and  
a second luminescent material embedded within a portion of each key cap different than the first material forming the identifying graphic symbol, the second luminescent material substantially embedded throughout each key cap.

20. (Canceled)

21. (Canceled)

22. (Previously Presented) A remote computer keyboard comprising:  
an enclosure member;  
a chemical source of electrical power;  
a transmitter mounted on said enclosure member, said transmitter powered by said chemical source of electrical power;  
an insulative material layer covered with circuit traces, said insulative material layer being positioned in said enclosure member, said circuit traces being coupled to said transmitter;  
a plurality of depressible key switch devices arrayed above said insulative material layer;  
a key cap mounted atop each switch device of said plurality of switch devices, each key cap having at least one identifying graphic symbol formed on a surface thereof of a first material having no electrical connection thereto including one of a black material and a dark-colored non-luminescent material; and  
a second luminescent material including tritium embedded within said at least one symbol of each key cap different than the first material forming the identifying graphic symbol, the second luminescent material substantially embedded throughout each key cap.

23. (Canceled)

24. (Canceled)
